ASNT6760-KHC
DC-33*GHz* Analog Signal Selector 1-of-2

- DC to 33*GHz* broadband operation
- Exhibits an extra-flat frequency response ideal for PAM3 and PAM4 applications
- Two differential CML-type input ports and one differential CML-type output port
- Single ended input linearity range up to $0.8V_{pk\text{-}pk}$ and differential input linearity up to $1.2V_{pk\text{-}pk}$
- Temperature-stabilized adjustable gain around 0dB
- Adjustable high-frequency peaking
- Adjustable internal currents for power consumption and bandwidth control
- Low jitter and limited temperature variation over industrial temperature range
- Single +3.6*V* or -3.6*V* power supply
- Power consumption: 700*mW*
- Fabricated in SiGe for high performance, yield, and reliability
- Custom CQFN 24-pin package

DESCRIPTION

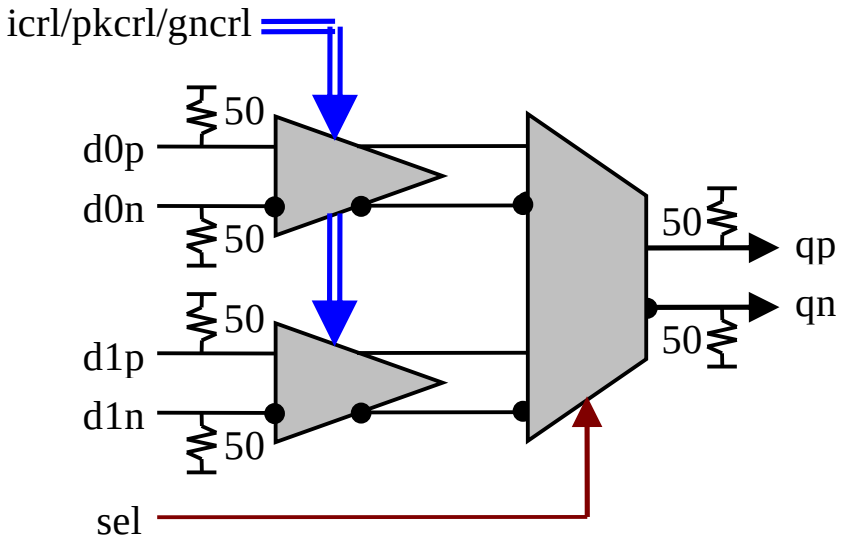

Fig. 1. Functional Block Diagram

The temperature stable ASNT6760-KHC analog signal selector 1-of-2 is intended for use in high-speed systems. Its extra-flat frequency response is ideal for PAM3 and PAM4 signals. The IC shown in Fig. 1 can deliver one of two different broad-band analog differential signals d1p/d1n and d2p/d2n to its differential output qp/qn with a nominal gain of 0*dB*. A low-speed analog current control icrl is available for power consumption and bandwidth adjustments. A low-speed analog control pkcrl is available for peaking adjustments at higher frequencies (above 25*GHz*). A relatively flat frequency response with variation of no more than ±0.5*dB* within DC-to-40*GHz* can be achieved with these two control voltages. Another low-speed analog control gncrl is available for gain adjustment. A nominal gain of 0*dB* can be achieved for all corner, voltage, and temperature variations. The active input selection is performed through the external high-speed single-ended port sel that can be referenced to either vcc or vee.

The part's I/O's support the CML logic interface with on chip 50*Ohms* termination to vcc and may be used differentially, AC/DC coupled, single-ended, or in any combination (also see POWER SUPPLY CONFIGURATION). In the DC-coupling mode, the input signal's common mode voltage should comply with the specifications shown in ELECTRICAL CHARACTERISTICS. In the AC-coupling mode, the input termination provides the required common mode voltage automatically.

POWER SUPPLY CONFIGURATION

The part can operate with either negative supply (vcc = 0.0*V* = ground and vee = −3.6*V*), or positive supply (vcc = +3.6*V* and vee = 0.0*V* = ground). In case of the positive supply, all I/Os need AC termination when connected to any devices with 50*Ohms* termination to ground. Different PCB layouts will be needed for each different power supply combination.

All the characteristics detailed below assume vcc = 0.0*V* = ground.

TYPICAL PERFORMANCE CHARACTERISTICS

At default values and with lower or higher current/power consumption, the frequency responses of ASNT6760-KHC are shown in Fig. 2.

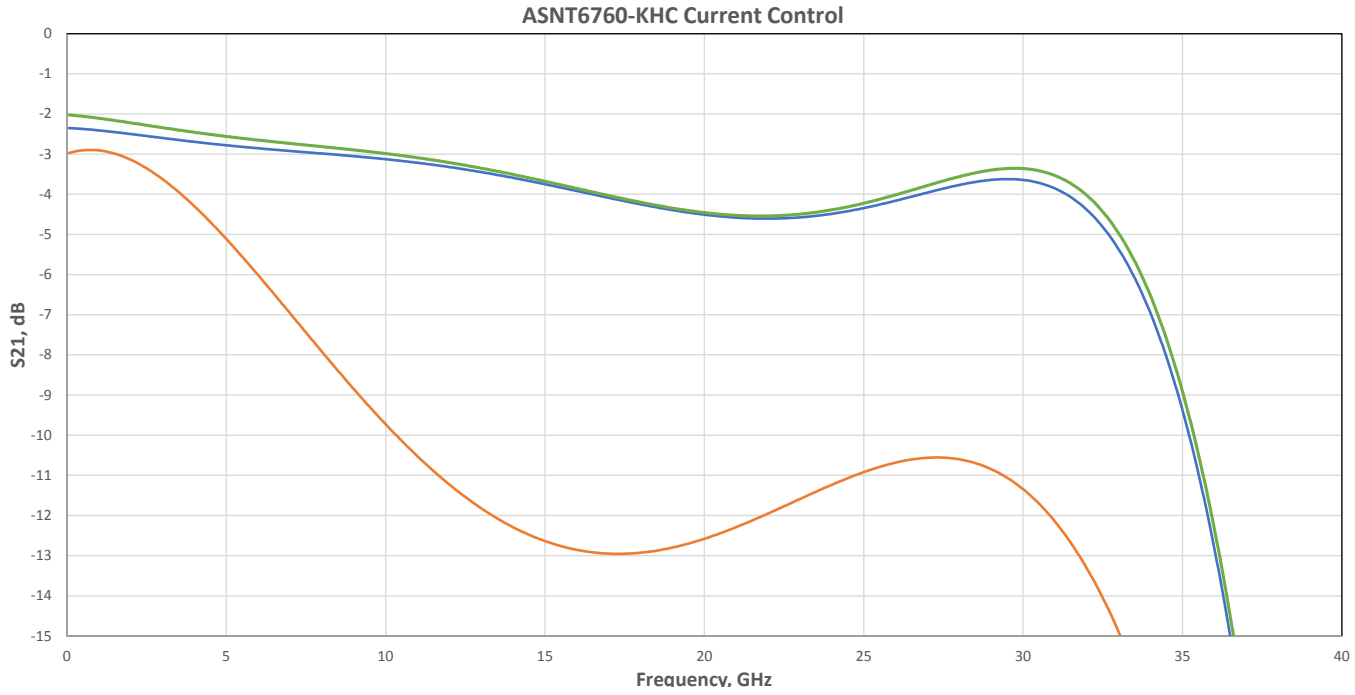

*Fig. 2. Frequency Response at **Minimum Current**, **Default**, and **Maximum Current***

The frequency responses at different gain controls are shown in Fig. ig. 3.

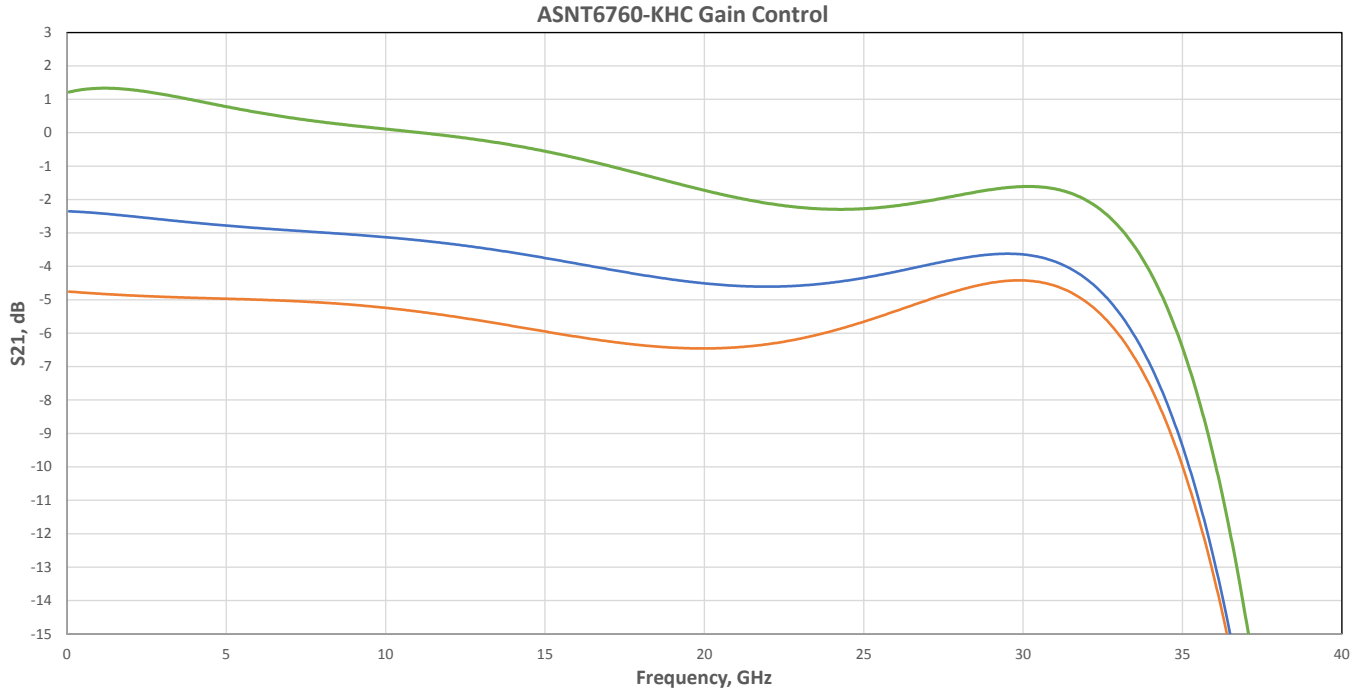

*Fig. 3. Frequency Response at **Minimum Gain**, **Default**, and **Maximum Gain***

ABSOLUTE MAXIMUM RATINGS

Caution: Exceeding the absolute maximum ratings shown in Table 1 may cause damage to this product and/or lead to reduced reliability. Functional performance is specified over the recommended operating conditions for power supply and temperature only. AC and DC device characteristics at or beyond the absolute maximum ratings are not assumed or implied. All min and max voltage limits are referenced to ground (assumed vcc).

Table 1. Absolute Maximum Ratings

Parameter	Min	Max	Units
Supply Voltage (vee)		-3.9	*V*
Power supply current		300	*mA*
Input Voltage	vcc-1.0	vcc+0.4	*V*
RF Input Voltage Swing (SE)		0.8	*V*
Case Temperature		+90	*ºC*
Storage Temperature	-40	+100	*ºC*
Operational Humidity	10	98	*%*
Storage Humidity	10	98	*%*

TERMINAL FUNCTION

TERMINAL			DESCRIPTION
Name	**No.**	**Type**	
High-speed Signals			
d1p	3	CML - type	Differential high speed data inputs with internal SE 50*Ohms* termination to vcc
d1n	5		
d2p	15	CML - type	
d2n	17		
qp	11	CML - type	Differential high speed data outputs with internal SE 50*Ohms* termination to vcc. Require external SE 50*Ohms* termination to vcc
qn	9		
Control Signals			
sel	21	CMOS	High-speed high-impedance input (active: high, d1 is connected to q default: low, d2 is connected to q;)
gncrl	19	Analog Control	Analog gain control with internal 15*KOhms* termination to vcc and 35*KOhms* termination to vee.
pkcrl	23		Analog peaking control with internal 48*KOhms* termination to vcc and 55*KOhms* termination to vee.
icrl	7		Analog current control with internal 24*KOhms* termination to vcc and 84.5*KOhms* termination to vee.
Supply and Termination Voltages			
Name	**Description**		**Pin Number**
vcc	Positive power supply rail		2, 4, 6, 8, 10, 12, 14, 16, 18, 20, 22, 24
vee	Negative power supply rail		1, 13

PACKAGE INFORMATION

The chip die is housed in a custom 24-pin CQFN package shown in Fig. 9. The package provides a center heat slug located on its back side to be used for heat dissipation. ADSANTEC recommends for this section to be soldered to the vcc plain, which is ground for a negative supply, or power for a positive supply.

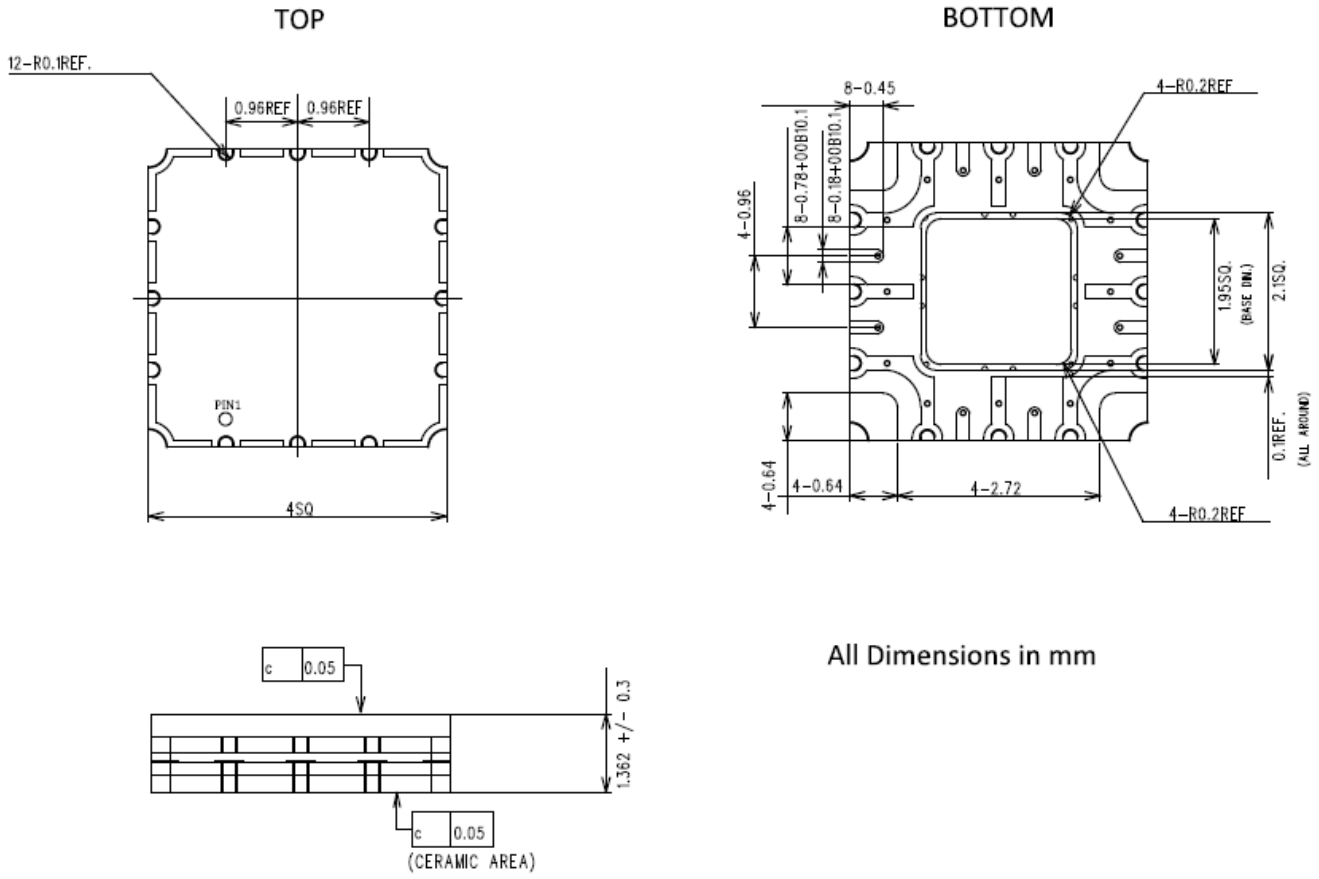

Fig. 9. CQFN 24-Pin Package Drawing (All Dimensions in mm)

The part's identification label is ASNT6760-KHC. The first 8 characters of the name before the dash identify the bare die including general circuit family, fabrication technology, specific circuit type, and part version while the 3 digits after the underscore represent the package's manufacturer, type, and pin out count.

This device complies with Commission Delegated Directive (EU) 2015/863 of 4 June 2015 amending Annex II to Directive 2011/65/EU of the European Parliament and of the Council as regards the list of restricted substances (Text with EEA relevance) on the restriction of the use of certain hazardous substances in electrical and electronics equipment (RoHS Directive) in accordance with the definitions set forth in the directives for all ten substances.
